Autosampler vials for your budget

Soon the year will be over and the first snowflakes have been sighted. It's time to change to winter tires and to plan next year's budget. That's why the standard 2 ml, 12 x 32 mm vials, available in clear and amber glass with caps in 5 different colours, are now available as an economy pack. If you prefer screw vials, choose our popular screw vial kits as an alternative.

For years, we have been producing vial racks in Zug, which allow an easy sample handling in the laboratory. We can fulfill almost any wish and also produce racks in special sizes and at special specifications. The distance between the vials in the rack is chosen to allow you to crimp the vials directly in the rack.

You'll find a detailed description of the products mentioned on page 2.
