Grüezi

the daily papers are full with news about the financial crisis, who is receiving billions, who has to pay them. Suddenly the economic life is grinding to a halt. We observed that our American suppliers no longer have the same delivery capacity as before the „crisis“. Many producers in America have minimised their stock in order to improve liquidity. This means longer delivery delays for everyone most of all for our customers. We decided to counterreact by renting an additional 250 m2 storage space for palette storage at Sumpfstr 3. Once set up and stocked up, our storage space will have doubled. We are certain that this will enable us to provide yet an even better service and will allow us to continue to ship your orders quickly and reliably.

We persue our strategy of offering an innovative programme of products from our own production supplemented by good distribution lines. Thus you have the choice between products from our own production in consistent high quality and an excellent cost/performance ratio and well established products. On the attached pdf you will find a table of 2008 products. A detailed pdf is ready for download from [infochroma.ch](http://infochroma.ch).

Everyone at infochroma ag and Glastechnik Gräfenroda GmbH wishes you a happy and restful holiday season in the circle of your family. We thank you for your confidence in us and your support in the last 15 years, without which the Swiss-German friendship would have just remained a dream.

Our offices are closed from 24. December until 4. January. An „emergency service“ for urgent orders has been set up.

We wish you all the best and to a good and hopefully mutual new 2009.

**iV2 $\mu$ -Vial: the Vial with the directly closable 250  $\mu$ l Insert**

**Storage Vials with "hard" Screw Cap for use up to 120°C**

**Sample Bottles from 6 ml - 1920 ml**

**HPLC Syringes from inert Polypropylene with volumes 1 ml - 50 ml**

**Filter with PTFE Membrane**

- ☛ for organic samples
- ☛ Pore size: 0.2  $\mu$ m
