## Additional Volumes complement the Storage and Septum Vial range

It was the Summer of 2006, when we first introduced the Storage Vials from our own production. The first sprouts were vials with 27 mm diameter and volumes of 10, 15, 20 and 25 ml, available in clear and amber glass. Our Storage Vial family grew quickly and now comprises vials with 12, 14, 19 and 27 mm diameter with volumes from 1 - 60 ml.

Our latest sprouts in the Spring of 2008 are a 7.5 ml vial with 19 mm diameter and 50 mm high and a 30 ml vial with 27 mm diameter and 78 mm high. These in-between sizes complement the volume range of the respective vial diameters and are introduced on the attached pdf.

As colourful as the spring flowers, which bud everywhere, are the screw caps for our Storage Vials (closed-top screw cap) and Septum Vial (open-top screw cap), which are available in 6 colours. The Septum Vial screw caps are assembled with silicone/PTFE septums. Vials and caps come complete in a white cardboard box with a grit divider. One box contains 100 vials.

Curious? Visit our website where the whole range of our Storage and Septum Vials is listed with all available volumes and dimensions. We are happy to send you samples.

## Additional Volumes complement the Storage and Septum Vial range

### 7.5 ml Storage and Septum Vial 19 x 50 mm in clear (H) and amber glass (D)
