Every year the Garden Gnome comes again...

Prepare in time for the approaching holidays. The new year is bound to bring some unexpected twists and turns, so hopefully you will spend relaxing holidays in the circle of your loved ones.

If you want to stock up on laboratory supplies, we recommend the ms-Pure caps or the Yeti filters for an interference-free chromatography. For the New Year resolution, we recommend the HPLC column storage which maintains the order in your laboratory. The garden gnomes, harbingers of spring, come free of charge with your order of storage vials. The gnomes from the garden gnome manufacturer Griebel in Gräfenroda, the birthplace of the garden gnome, are still handcrafted.

For the special present under the Christmas tree, check out chemoline.ch. A tie printed with the periodic system of the elements is always looking good and may be the source of new acquaintances, with the [Bi][Er] set you have the proper set for celebrating and clinging glasses and with the «toxy» T-shirt you'll certainly be noted. Check out the attached pdf for ideas.

Please note that this week, our Swiss office will be closed on Thursday 8. December because of a holiday (Fiest of the immaculate Conception) and on Friday 9. December because of the celebration of the 20 year jubilee of our partner company Glastechnik Gräfenroda GmbH. The jubilee is also the reason there will be no order processing in Gräfenroda on Friday.

This year infochroma ag has been operating for 44 years (1967 - 2011) and in honour of our 44 years you will find a voucher code for 44 times 50 Rp below for your purchase at chemoline.ch.

We now wish you a merry Christmas and a happy New Year and health and happiness in 2012.
