

## V-Vial with black opaque coating

Light may cause light sensitive samples to undergo a light-induced chemical reaction during sampling, analysis, storage or transport. Vials with a black opaque coating protect your light sensitive samples.

### Crimp V-Vial

V-Vial with 1.5 ml total volume and small residual volume, with black opaque coating to protect light sensitive samples

**8002-CV-D/V15 $\mu$ /black**

### Agilent compatible V-Vial 9 mm Screw Thread

V-Vial with 1.5 ml total volume and small residual volume, with black opaque coating to protect light sensitive samples

**8004-HP-D/V15 $\mu$ /black**
